

Hanif Jamadar

Pune, Maharashtra, India

jamadarmhanif@gmail.com | +91-8485037484 | GitHub | LinkedIn | Portfolio

Technical Skills

Programming Languages: C, C++, JavaScript, Java, Python

Frameworks: React.js, React Native (Expo), TypeScript, Tailwind CSS

DB & Backend: MySQL, MongoDB, Node.js, Express.js, REST APIs

Cloud Computing: Microsoft Azure Fundamentals

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman, XAMPP, Figma, Power BI, Linux

Soft Skills: Quick Learner, Problem Solving, Debugging & Error Handling, Communication Skills, Teamwork

Internship Experience

Navotkarsha IT Solutions Pvt. Ltd.

Dec 2025 – Jun 2026

Full Stack Developer Intern

Pune, Maharashtra

- Developed and enhanced **WorkTrack**, a worker attendance and management application using React Native, TypeScript, Appwrite, and REST APIs by implementing 10+ core application workflows including attendance tracking, salary calculation, dashboard analytics, and admin management features.
- Contributed to **Roomify**, an AI-powered interior visualization web application using React.js (Vite) and modern frontend tooling by building responsive UI components, drag-and-drop image upload systems, authentication workflows, and frontend-backend integrations.

Projects

Workly – An AI-Powered Platform for Hyperlocal Micro Job Finding : (React Native (Expo), Node.js, Appwrite (NoSQL), Machine Learning)

- Engineered a robust backend infrastructure using Node.js and Appwrite, deploying role-based access control (RBAC) and secure authentication for a dual-user (job poster vs. worker) marketplace.
- Implemented a Machine Learning-driven worker ranking and proximity-based recommendation engine to maximize hyperlocal job-matching accuracy and reduce search latency.
- Authored a peer-reviewed research paper detailing the platform's AI matching system, accepted and presented at the **IEEE IATMSI-2026** conference.

BlinkType Assist – Eye Blink Based Typing System : (Python, OpenCV, dlib)

- Created a hands-free virtual typing interface driven by eye-gaze tracking and blink gestures.
- Utilized dlib facial landmark detection to map real-time gaze input with minimal processing latency.

Roomify – AI-Based Interior Visualization Platform : (React.js, TypeScript, Vite, Tailwind CSS, Puter AI)

- Built an AI-powered web application that converts floor-plan images into photorealistic **3D room visualizations** using Puter AI
- Implemented authentication, cloud storage, image upload, and before/after comparison features using React.js and TypeScript.

Stock Price Prediction Using ML : (Python, Streamlit, TensorFlow, LSTM)

- Developed a web-based stock price prediction system using the **LSTM algorithm** to analyze historical time series data.
- Implemented an interactive Streamlit interface for visualizing stock trends and displaying predicted prices in real time.

Education

G. H. Raisoni College of Engineering and Management, Pune

Sep 2023 – Jun 2026

Bachelor of Technology in Computer Engineering

CGPA: 8.62

Maharashtra State Board of Technical Education, Mumbai

Jan 2021 – Jun 2023

Diploma in Computer Engineering, SVSMD's KKI Polytechnic, Akkalkot

87.20%

Maharashtra State Board of Secondary and Higher Education, Pune

July 2019 - Jun 2020

SSC, Maindargi Dist. Solapur

92.60%

Certifications

- IEEE IATMSI-2026 Research Paper Presentation & Acceptance Certificate** – ABV-IIITM Gwalior
- Advanced Python** – IIT Bombay
- Introduction to Internet of Things** – NPTEL
- CSS3** – Infosys Springboard
- Smart India Hackathon** – College-Level Participation Certificate
