

Hanif Jamadar

Pune, Maharashtra, India

jamadarmhanif@gmail.com | +91-8485037484 | GitHub | LinkedIn | My-Portfolio

Professional Summary

B.Tech Computer Engineering graduate (CGPA: 8.62) with hands-on full-stack and mobile development experience in React Native, React.js, Node.js, and Appwrite, gained through a Full Stack Developer internship and multiple end-to-end projects across web, mobile, and applied ML. Co-authored and presented a paper at IEEE IATMSI-2026. Targeting entry-level Full Stack Developer / Software Engineer roles.

Technical Skills

Languages: C, C++, Java, JavaScript, Python

Frontend: React.js, React Native (Expo), TypeScript, Tailwind CSS, HTML, CSS

Backend & Databases: Node.js, Express.js, REST APIs, MySQL, MongoDB, Appwrite

Cloud: Microsoft Azure Fundamentals (Certified)

Tools & Platforms: Git, GitHub, Postman, VS Code, Android Studio, Linux, XAMPP, Figma, Power BI

Soft Skills: Problem Solving, Debugging & Error Handling, Communication, Teamwork, Quick Learner

Internship Experience

Navotkarsha IT Solutions Pvt. Ltd.

Dec 2025 – Jun 2026

Full Stack Developer Intern

Pune, Maharashtra

- Developed and enhanced **WorkTrack**, a worker attendance and management application, using React Native, TypeScript, Appwrite, and REST APIs; implemented 10+ core application workflows including attendance tracking, salary calculation, dashboard analytics, and admin management features.
- Built core features for **Roomify**, an AI-powered interior visualization web application (React.js/Vite), including responsive UI components, drag-and-drop image upload, authentication workflows, and frontend-backend integration (full detail under Projects).

Projects

Workly – An AI-Powered Platform for Hyperlocal Micro Job Finding : (React Native (Expo), Node.js, Appwrite (NoSQL), Machine Learning)

- Engineered backend infrastructure using Node.js and Appwrite, implementing role-based access control (RBAC) and secure authentication for a dual-user (job poster vs. worker) marketplace.
- Built a Machine Learning-driven worker ranking and proximity-based recommendation engine to improve hyperlocal job-matching accuracy and reduce search latency.
- Co-authored a peer-reviewed research paper on the platform's AI matching system, accepted and presented at the **IEEE IATMSI-2026** conference.

Roomify – AI-Based Interior Visualization Platform : (React.js, TypeScript, Vite, Tailwind CSS, Puter AI) – built during Navotkarsha internship

- Developed core features of an AI-powered web application that converts floor-plan images into photorealistic 3D room visualizations using Puter AI.
- Implemented authentication, cloud storage, image upload, and before/after comparison features using React.js and TypeScript.

BlinkType Assist – Eye Blink Based Typing System : (Python, OpenCV, dlib)

- Built a hands-free virtual typing interface driven by eye-gaze tracking and blink gestures.
- Used dlib facial landmark detection to map real-time gaze input with low processing latency.

Stock Price Prediction Using ML : (Python, TensorFlow, LSTM, Streamlit)

- Built a web-based stock price prediction system using an LSTM model to analyze historical time-series data.
- Developed an interactive Streamlit interface to visualize stock trends and display predicted prices in real time.

Education

G. H. Raisoni College of Engineering and Management, Pune

Sep 2023 – Jun 2026

Bachelor of Technology in Computer Engineering

CGPA: 8.62

SVSMD's KKI Polytechnic, Akkalkot (MSBTE, Mumbai)

Jan 2021 – Jun 2023

Diploma in Computer Engineering

87.20%

Maindargi, Dist. Solapur (Maharashtra State Board)

2020

Secondary School Certificate (SSC)

92.60%

Certifications

- IEEE IATMSI-2026 Research Paper Presentation & Acceptance Certificate – ABV-IIITM Gwalior
- Advanced Python – IIT Bombay
- Introduction to Internet of Things – NPTEL
- CSS3 – Infosys Springboard
- Smart India Hackathon – College-Level Participation Certificate
